SUMMARY

I am a process improvement engineer with 2+ years of experience in automotive manufacturing and operational analytics. I combine Lean Manufacturing, Six Sigma, RCA, and SPC with Power BI, Excel, and Power Automate to improve cycle time, quality, KPI visibility, and production reporting on the shop floor.

PROFESSIONAL EXPERIENCE

04/2021 – 05/2023 **Hyundai Nishat Motor (Pvt.) Ltd.**

Faisalabad, Pakistan *Data Analyst and Process Improvement Engineer*

- Conducted workload balancing and Yamazumi analysis across Trim, Chassis, and Final assembly lines, eliminating Mura and reducing assembly cycle time by 20%.
- Built real-time operational KPI dashboards in Power BI and Excel for production, quality, downtime, and defects across three assembly lines.
- Automated daily production reporting and SAP data extraction with Power Query and Excel VBA, removing manual compilation and spreadsheet errors.
- Implemented a defect categorization workflow with Power Automate and Power BI that auto-assigned production defects by severity to responsible engineers.
- Represented the Assembly Shop in a cross-functional Zero-Defect initiative, tracing selected vehicles through each assembly gate to define and standardize perfect-build quality metrics.
- Introduced a Line Side Rejection tracking procedure to intercept supplier defects and operator handling issues before installation, reducing rework man-hours and secondary damage.
- Coordinated pre-production launch readiness by validating 200+ parts, managing supplier feedback loops, and issuing KDQR-based escalation for Sonata and Santa-Fe quality topics.

07/2025 – 05/2026

Pullach, Germany

Linde GmbH, Linde Engineering - Commercial Department

Data Analytics & Digitalization

- Built stakeholder-facing KPI dashboards in Power BI for commercial and engineering teams, using data models, DAX, and Power Query to improve reporting quality and operational visibility.
- Advised cross-functional users on Power BI model design, Row-Level Security, DAX, and M transformations, enabling stronger self-service analytics and more reliable reporting practices.
- Supported Agile delivery of digital reporting initiatives by aligning requirements with business stakeholders, validating data quality, and coordinating rollout priorities across departments.

02/2026 – 08/2026
Pullach, Germany

Linde GmbH, Linde Engineering - Commercial Department
Master Thesis - Semantic Layer

- Thesis Title: **Designing a Semantic Layer for Enterprise Analytics and AI Integration.**
- Designed a semantic layer for enterprise analytics that improved data discovery, relationship mapping, and governed access to operational datasets.
- Built controlled access logic with Row-Level Security, permission synchronization, and query validation to enforce data governance in self-service analytics workflows.
- Developed a conversational data access workflow that guided users through dataset search, schema discovery, and SQL generation, reducing manual coordination across systems.

SKILLS

Process Improvement & Operational Excellence – Lean Manufacturing | Six Sigma | Kaizen | 5S | Process Re-engineering | Root Cause Analysis (RCA) | Time and Motion Studies

Quality & Production Control – Statistical Process Control (SPC) | Overall Equipment Effectiveness (OEE) | BOM Validation | Internal Auditing | ISO Documentation | Line Side Rejection (LSR) | KDQR

Analytics & Reporting – Power BI | Excel | Power Query | DAX | KPI Reporting | Self-Service Analytics | SQL

Automation Tools – Power Automate | Excel VBA | Python | Pandas | Reporting Automation

Manufacturing Domain – Automotive Manufacturing | Downtime Analysis | Defect Tracking | Production Reporting | Supplier Quality Coordination | Pre-Production Launch Support

EDUCATION

03/2023 – 08/2026
Wernigerode, Germany

Master of Engineering, Technology and Innovation Mgmt.
Hochschule Harz

- **Grade:** 2.2/5.0
- **Key Courses:** Industry 4.0, Data Analytics, Market Intelligence, Strategic Management, Business Model Development, Digital Transformation, Agile Requirements Engineering, Information Retrieval, Big Data

12/2015 – 08/2019
Karachi, Pakistan

Bachelor of Engineering, Mechanical Engineering
NED University of Engineering and Technology

- **Grade:** 1.7/5.0
- **Key Courses:** Engineering Drawing, Machine Design, Manufacturing Processes, Operations Management, Production Engineering, Plant Maintenance, Powerplant Engineering, Applied Economics for Engineers
